Re: Notice of Intention to Commence Small Mining/Dredging Activities, Sunstream #1 Project, S/043/016, Summit County, Utah

Dear Mr. Ganswich:

On June 23, 1994, we received your application to Commence Small Mining Activities on USFS lands, located in Sections 16, 17, and 21, T1S, R7E, SLBM, Summit County, Utah. Your notice indicated you would be performing dredging activities. This letter is to inform you of the Division's current rules and permitting requirements regarding such activities.

As long as mechanized equipment is being used to mine or otherwise extract a mineral deposit from the land or waters of the state, the activity must be permitted by our agency. We have evaluated your SMO Notice of Intention for completeness and find that it meets the requirements of Rule R647-3 of this Division's 1988 Minerals Rules, and Title 40-8, et seq., of the Utah Mined Land Reclamation Act of 1975.

There is no fee involved in filing with the Division of Oil, Gas and Mining. However, since your dredging activities fall on U.S. Forest Service lands, you will need to contact them directly regarding their permitting and/or notification requirements. We have been informed that dredging, panning or any recreational activity of this type **is not** allowed on main tributaries of the Wasatch National Forest.

Certain types of high impact dredging activities may require a permit (Stream Alteration 040 Permit) from the Utah State Division of Water Rights if your dredging will impact a sensitive waterway. It is our understanding that there are certain streams/rivers, or sections thereof, within the state that may be "restricted or closed" to this type of activity. Please contact Jim Wells of the Division of Water Rights before starting your dredging activities for any additional pertinent application forms and permits.

Their address and phone number is: State Division of Water Rights, Room 220, 1636 West North Temple, Salt Lake City, Utah 84116 (801) 538-7240. We will forward a copy of your SMO application to their office for their information and processing.

Certain streams and rivers of the state have established fisheries that may be very sensitive to dredging activities at certain times of the year (i.e., spawning seasons). Please contact the regional fisheries manager of the State Division of Wildlife Resources (list of area offices enclosed) prior to beginning dredging activities to determine if you will be working in a sensitive section of streams during a critical spawning season.

If we can be of further assistance, please contact us.

Sincerely,

A handwritten signature in black ink, appearing to read 'Lynn Kunzler', with a stylized flourish at the end.

Lynn Kunzler  
Reclamation Specialist
